

# HIPAA DATA SECURITY:

YOUR EMPLOYEES ARE YOUR BIGGEST RISK

“ The Healthcare vertical is rife with Error and Misuse. In fact, it is the only industry vertical that has more internal actors behind breaches than external.”<sup>1</sup>

**71** % OF CYBSECURITY INCIDENTS IN HEALTHCARE INVOLVE EMPLOYEE ACTIONS<sup>1</sup>

**53%** by “inadvertent actors”<sup>1</sup>

(error, physical loss/theft, social/phishing)

**18%** by “malicious insiders”<sup>1</sup>

(privilege misuse)

“ Healthcare is almost **7** times more likely to feature a causal error [in cybersecurity incidents] than other [industries].”<sup>1</sup>

## SENSITIVE PATIENT DATA AT RISK

Data contained in healthcare data breaches:<sup>1</sup>

\* Breaches often contain multiple data types so the total does not equal 100.

## 62% OF ALL EMPLOYEE ERRORS WERE MISDELIVERY OF PRIVILEGED INFORMATION

misplaced assets, misconfigurations, publishing errors and disposal errors accounted for much of the rest<sup>1</sup>

In instances of intentional misuse, the motives are almost equally divided between reasons of...

**FUN OR CURIOSITY (I.E., SNOOPING)**  
&  
**FINANCIAL GAIN<sup>1</sup>**

**\$380** =

Average cost of a data breach in the healthcare industry per medical record<sup>2</sup>

**69% greater** than the national average<sup>2</sup>

## RANSOMWARE — AN OMINOUS THREAT

**CAUSE:** Employee opens an attachment or link in spam email

**RESULT:** Attacker blocks access to critical patient data

**DANGER:** Patient safety at risk

**COST:** 10s of thousands of dollars to unlock data
